

Outreach Research Survey

Could you help us plan for the future?

The Rainbow Centre for Conductive Education is a Hampshire charity providing neuro-rehabilitation to children with cerebral palsy and other motor disorders, and adults affected by long-term neurological conditions such as: Parkinson's, Multiple Sclerosis (MS), a stroke or a head injury, who come to the Centre from across the South East.

We are looking into the possibility of extending our adult services to provide an outreach service for adults who are unable to travel to The Rainbow Centre. We would welcome feedback from potential participants and/or their carers, who may be interested in benefiting from an outreach service, to help us establish whether there is a need for the service and to help us shape any potential service. We would like to reassure you that your feedback and answers will be kept confidential.

General Information

Do you have a neurological condition yourself or are you a carer for someone with a neurological condition?

- I have a neurological condition I care for someone with a neurological condition

Which condition do you/the person you care for have?

- Parkinson's Multiple Sclerosis Stroke
 Head injury Cerebral palsy Other neurological condition
